Chapter 1

SOS_README

SOS and other diagnostic tools now ship of band and work with any version of the .NET Core runtime.

SOS has moved to the diagnostics repo here: https://github.com/dotnet/diagnostics.git.

Instructions to install SOS: https://github.com/dotnet/diagnostics#installing-sos.

Chapter 2

SOS_README

SOS and other diagnostic tools now ship of band and work with any version of the .NET Core runtime.

SOS has moved to the diagnostics repo here: https://github.com/dotnet/diagnostics.git.

Instructions to install SOS: https://github.com/dotnet/diagnostics#installing-sos.

Chapter 3

Namespace Index

3.1 Packages

Here are the packages with brief descriptions (if available):

latex_curriculum_vitae 11
latex_curriculum_vitae.Data 12
latex_curriculum_vitae.Mappers 12
latex_curriculum_vitae.Models 12
latex_curriculum_vitae.Properties 12
latex_curriculum_vitae.Services 12

Chapter 4

Hierarchical Index

4.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

Application
- latex_curriculum_vitae.App . . . 13

latex_curriculum_vitae.Build . . . 17

ClassMap
- latex_curriculum_vitae.Mappers.JobApplicationMap . . . 36

latex_curriculum_vitae.Company . . . 21

latex_curriculum_vitae.Configuration . . . 23

latex_curriculum_vitae.Constants . . . 25

latex_curriculum_vitae.Contact . . . 25

latex_curriculum_vitae.CSVExport . . . 27

latex_curriculum_vitae.Constants.CsvHeaders . . . 27

DbContext
- latex_curriculum_vitae.Data.JobApplicationDataDbContext . . . 35

latex_curriculum_vitae.Email . . . 31

latex_curriculum_vitae.Constants.General . . . 32

IComponentConnector
- latex_curriculum_vitae.DatabaseWindow . . . 28
- latex_curriculum_vitae.MainWindow . . . 37
- latex_curriculum_vitae.UserSettingsWindow . . . 63
- latex_curriculum_vitae.WriteJobApplicationWindow . . . 66

latex_curriculum_vitae.Services.ICsvParserService . . . 33
- latex_curriculum_vitae.Services.CsvParserService . . . 27

IStyleConnector
- latex_curriculum_vitae.DatabaseWindow . . . 28

latex_curriculum_vitae.JobApplication . . . 33

latex_curriculum_vitae.Data.JobApplicationData . . . 35

latex_curriculum_vitae.Models.JobApplicationModel . . . 36

latex_curriculum_vitae.Properties.Resources . . . 40

latex_curriculum_vitae.Setup . . . 59

latex_curriculum_vitae.User . . . 61

Window
- latex_curriculum_vitae.DatabaseWindow . . . 28
- latex_curriculum_vitae.MainWindow . . . 37
- latex_curriculum_vitae.UserSettingsWindow . . . 63
- latex_curriculum_vitae.WriteJobApplicationWindow . . . 66

Chapter 5

Class Index

5.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

latex_curriculum_vitae.App
: Interaction logic for App.xaml . . . 13

latex_curriculum_vitae.Build
: Class for compiling and building the LaTEX documents and it merges all pdfs in one . . . 17

latex_curriculum_vitae.Company
: This class is for building a instance of the Company object . . . 21

latex_curriculum_vitae.Configuration
: This class is for configure the project . . . 23

latex_curriculum_vitae.Constants . . . 25

latex_curriculum_vitae.Contact
: This class is for instancing a Contact object . . . 25

latex_curriculum_vitae.CSVExport . . . 27

latex_curriculum_vitae.Constants.CsvHeaders . . . 27

latex_curriculum_vitae.Services.CsvParserService . . . 27

latex_curriculum_vitae.DatabaseWindow
: DatabaseWindow . . . 28

latex_curriculum_vitae.Email
: This class is for creating and sending job applications via email . . . 31

latex_curriculum_vitae.Constants.General . . . 32

latex_curriculum_vitae.Services.ICsvParserService . . . 33

latex_curriculum_vitae.JobApplication
: This is a class for instancing the JobApplication object . . . 33

latex_curriculum_vitae.Data.JobApplicationData . . . 35

latex_curriculum_vitae.Data.JobApplicationDataDbContext . . . 35

latex_curriculum_vitae.Mappers.JobApplicationMap . . . 36

latex_curriculum_vitae.Models.JobApplicationModel . . . 36

latex_curriculum_vitae.MainWindow
: MainWindow . . . 37

latex_curriculum_vitae.Properties.Resources
: Eine stark typisierte Ressourcenklasse zum Suchen von lokalisierten Zeichenfolgen usw . . . 40

latex_curriculum_vitae.Setup
: This class contains methods for doing the setup . . . 59

latex_curriculum_vitae.User
: This class instances the User object . . . 61

latex_curriculum_vitae.UserSettingsWindow
: UserSettingsWindow . . . 63

latex_curriculum_vitae.WriteJobApplicationWindow
: WriteJobApplicationWindow . . . 66

Chapter 6

Namespace Documentation

6.1 latex_curriculum_vitae Namespace Reference

Classes

- class App

  Interaction logic for App.xaml
- class Build

  Class for compiling and building the LaTEX documents and it merges all pdfs in one.
- class Company

  This class is for building a instance of the Company object.
- class Configuration

  This class is for configure the project.
- class Constants
- class Contact

  This class is for instancing a Contact object.
- class CSVExport
- class DatabaseWindow

  DatabaseWindow
- class Email

  This class is for creating and sending job applications via email
- class JobApplication

  This is a class for instancing the JobApplication object
- class MainWindow

  MainWindow
- class Setup

  This class contains methods for doing the setup
- class User

  This class instances the User object.
- class UserSettingsWindow

  UserSettingsWindow
- class WriteJobApplicationWindow

  WriteJobApplicationWindow

6.2 latex_curriculum_vitae.Data Namespace Reference

Classes

- class JobApplicationData
- class JobApplicationDataDbContext

6.3 latex_curriculum_vitae.Mappers Namespace Reference

Classes

- class JobApplicationMap

6.4 latex_curriculum_vitae.Models Namespace Reference

Classes

- class JobApplicationModel

6.5 latex_curriculum_vitae.Properties Namespace Reference

Classes

- class Resources

  Eine stark typisierte Ressourcenklasse zum Suchen von lokalisierten Zeichenfolgen usw.
- class **Settings**

6.6 latex_curriculum_vitae.Services Namespace Reference

Classes

- class CsvParserService
- interface ICsvParserService

Chapter 7

Class Documentation

7.1.1 Detailed Description

Interaction logic for App.xaml

App

7.1.2 Member Function Documentation

7.1.2.1 InitializeComponent() [1/8]

```
void latex_curriculum_vitae.App.InitializeComponent ( )
```

InitializeComponent

7.1.2.2 InitializeComponent() [2/8]

```
void latex_curriculum_vitae.App.InitializeComponent ( )
```

InitializeComponent

7.1.2.3 InitializeComponent() [3/8]

```
void latex_curriculum_vitae.App.InitializeComponent ( )
```

InitializeComponent

7.1.2.4 InitializeComponent() [4/8]

```
void latex_curriculum_vitae.App.InitializeComponent ( )
```

InitializeComponent

7.1.2.5 InitializeComponent() [5/8]

```
void latex_curriculum_vitae.App.InitializeComponent ( )
```

InitializeComponent

7.1.2.6 InitializeComponent() [6/8]

```
void latex_curriculum_vitae.App.InitializeComponent ( )
```

InitializeComponent

7.1.2.7 InitializeComponent() [7/8]

```
void latex_curriculum_vitae.App.InitializeComponent ( )
```

InitializeComponent

7.1.2.8 InitializeComponent() [8/8]

```
void latex_curriculum_vitae.App.InitializeComponent ( )
```

InitializeComponent

7.1.2.9 Main() [1/8]

```
static void latex_curriculum_vitae.App.Main ( )  [static]
```

Application Entry Point.

7.1.2.10 Main() [2/8]

```
static void latex_curriculum_vitae.App.Main ( )  [static]
```

Application Entry Point.

7.1.2.11 Main() [3/8]

```
static void latex_curriculum_vitae.App.Main ( )  [static]
```

Application Entry Point.

7.1.2.12 Main() [4/8]

```
static void latex_curriculum_vitae.App.Main ( )  [static]
```

Application Entry Point.

7.1.2.13 Main() [5/8]

```
static void latex_curriculum_vitae.App.Main ( )  [static]
```

Application Entry Point.

7.1.2.14 Main() [6/8]

```
static void latex_curriculum_vitae.App.Main ( )  [static]
```

Application Entry Point.

7.1.2.15 Main() [7/8]

```
static void latex_curriculum_vitae.App.Main ( )  [static]
```

Application Entry Point.

7.1.2.16 Main() [8/8]

```
static void latex_curriculum_vitae.App.Main ( )  [static]
```

Application Entry Point.

The documentation for this class was generated from the following files:

- C:/Users/Sasch/OneDrive/source/repos/Visual_Studio/latex_curriculum_vitae-dotnet/latex_curriculum_↩ vitae/App.xaml.cs
- C:/Users/Sasch/OneDrive/source/repos/Visual_Studio/latex_curriculum_vitae-dotnet/latex_curriculum_↩ vitae/obj/Debug/netcoreapp3.1/App.g.cs
- C:/Users/Sasch/OneDrive/source/repos/Visual_Studio/latex_curriculum_vitae-dotnet/latex_curriculum_↩ vitae/obj/Debug/netcoreapp3.1/App.g.i.cs

7.2 latex_curriculum_vitae.Build Class Reference

Class for compiling and building the LaTEX documents and it merges all pdfs in one.

Static Public Member Functions

- static void PrepareBuild ()

  This method copies the needed LaTEX documents to the temporary directory. It doesn't return anything.
- static string GetSubject (string subjectprefix, string jobtitle)

  This method combines the language dependend subjectprefix with the Jobtitle. Ex: Application as Softwaredeveloper. It returns the combined subject for the LaTEX letter of application. The returned string contains escaped characters like hash and ampersand.
- static string GetEmailSubject (string subjectprefix, string jobtitle)

  This method combines the language dependend subjectprefix with the Jobtitle. Ex: Application as Softwaredeveloper. It returns the combined subject for the LaTEX letter of application. The returned string comes without the escape sequences.
- static void CreateApplicationConfig (string jobtitle, string company, string contact, string street, string city, string salutation, string subject, string addressstring)

  This method creates the job application specific LaTEX file "application_details.tex". It will be used in letter of application. The method doesn't return anything.
- static void CompileApplication ()

  This methods uses pdflatex and xelatex for compiling the LaTEX documents. It doesn't returns anything.
- static string GetFinalPdfName (string firstname, string familyname)

  This method combines the language specific string for "application documents" with users firstname and familyname. Ex: Application_Documents_Sascha_Manns.pdf
- static void CombineApplication (string firstname, string familyname)

  This method combines pdfs. So you get a pdf for your certificates of employment, a seperate pdf for other certificates and a final pdf what contains letter of application, curriculum vitae and certs. It doesn't returns anything.
- static void OpenExplorer ()

  This method opens the Windows Explorer after merging the pdfs in that case, that you haven't set a company email address.

Static Private Member Functions

- static void MergePDFs (string targetPath, params string[ ] pdfs)

  This method is only for merging pdfs. It doesn't returns anything.

Static Private Attributes

- static readonly string **tmpDir** = Path.GetTempPath()

7.2.1 Detailed Description

Class for compiling and building the LaTEX documents and it merges all pdfs in one.

7.2.2 Member Function Documentation

7.2.2.1 CombineApplication()

```
static void latex_curriculum_vitae.Build.CombineApplication (
            string firstname,
            string familyname )  [static]
```

This method combines pdfs. So you get a pdf for your certificates of employment, a seperate pdf for other certificates and a final pdf what contains letter of application, curriculum vitae and certs. It doesn't returns anything.

Parameters

firstname	comes from myuser.firstname (contains users first name)
familyname	comes from myuser.familyname (contains users surname)</param

7.2.2.2 CompileApplication()

```
static void latex_curriculum_vitae.Build.CompileApplication ( )  [static]
```

This methods uses pdflatex and xelatex for compiling the LaTEX documents. It doesn't returns anything.

7.2.2.3 CreateApplicationConfig()

```
static void latex_curriculum_vitae.Build.CreateApplicationConfig (
            string jobtitle,
```

```
            string company,
            string contact,
            string street,
            string city,
            string salutation,
            string subject,
            string addressstring )  [static]
```

This method creates the job application specific LaTEX file "application_details.tex". It will be used in letter of application. The method doesn't return anything.

Parameters

jobtitle	comes from myapplication.Jobtitle (contains the Jobtitle)
company	comes from company.Name (contains the company name)
contact	comes from contact.Name (contains the name of companies contact person)
street	comes from company.Street (contains companies street)
city	comes from company.City (contains companies city)
salutation	comes from contact.Salutation (contains letters salutation)
subject	comes originary from GetSubject() method.
addressstring	comes originary from contact.Addressline() method.

7.2.2.4 GetEmailSubject()

```
static string latex_curriculum_vitae.Build.GetEmailSubject (
            string subjectprefix,
            string jobtitle )  [static]
```

This method combines the language dependend subjectprefix with the Jobtitle. Ex: Application as Softwaredeveloper. It returns the combined subject for the LaTEX letter of application. The returned string comes without the escape sequences.

Parameters

subjectprefix	comes from myuser.Subjectprefix
jobtitle	comes from myapplication.Jobtitle (contains the Jobtitle)

Returns

string subject

7.2.2.5 GetFinalPdfName()

```
static string latex_curriculum_vitae.Build.GetFinalPdfName (
            string firstname,
            string familyname )  [static]
```

This method combines the language specific string for "application documents" with users firstname and familyname. Ex: Application_Documents_Sascha_Manns.pdf

Parameters

firstname	comes from myuser.firstname (contains users first name)
familyname	comes from myuser.familyname (contains users surname)

Returns

string finalpdf

7.2.2.6 GetSubject()

```
static string latex_curriculum_vitae.Build.GetSubject (
            string subjectprefix,
            string jobtitle )  [static]
```

This method combines the language dependend subjectprefix with the Jobtitle. Ex: Application as Softwaredeveloper. It returns the combined subject for the LaTEX letter of application. The returned string contains escaped characters like hash and ampersand.

Parameters

subjectprefix	comes from myuser.Subjectprefix
jobtitle	comes from myapplication.Jobtitle

Returns

subject

7.2.2.7 MergePDFs()

```
static void latex_curriculum_vitae.Build.MergePDFs (
            string targetPath,
            params string[] pdfs )  [static], [private]
```

This method is only for merging pdfs. It doesn't returns anything.

Parameters

targetPath	defines the path where the needed pdfs come from.
pdfs	is a array of pdf pathes to merge.

7.2.2.8 OpenExplorer()

```
static void latex_curriculum_vitae.Build.OpenExplorer ( )  [static]
```

This method opens the Windows Explorer after merging the pdfs in that case, that you haven't set a company email address.

7.2.2.9 PrepareBuild()

```
static void latex_curriculum_vitae.Build.PrepareBuild ( )  [static]
```

This method copies the needed LaTEX documents to the temporary directory. It doesn't return anything.

The documentation for this class was generated from the following file:

- C:/Users/Sasch/OneDrive/source/repos/Visual_Studio/latex_curriculum_vitae-dotnet/latex_curriculum_↩ vitae/Build.cs

7.3 latex_curriculum_vitae.Company Class Reference

This class is for building a instance of the Company object.

Public Member Functions

- Company (string coname, string costreet, int czip, string cocity)

  This Constructor sets the given arguments to this class Properties.
- Company (string coname)

  This constructor will be used in case of we haven't a correct address for the company. It sets just the company name.

Properties

- string **Name** `[get, set]`
- string **Street** `[get, set]`
- int **ZIP** `[get, set]`
- string **City** `[get, set]`

7.3.1 Detailed Description

This class is for building a instance of the Company object.

7.3.2 Constructor & Destructor Documentation

7.3.2.1 Company() [1/2]

```
latex_curriculum_vitae.Company.Company (
            string coname,
            string costreet,
            int czip,
            string cocity )
```

This Constructor sets the given arguments to this class Properties.

Parameters

coname	comes directly from gui txtCompanyName.Text (Contains companies name)
costreet	comes directly from the gui txtCompanyStreet.Text (Contains companies street)
czip	comes directly from the gui txtZIP.Text (Contains companies ZIP)
cocity	comes directly from the gui txtCity.Text (Contains companies city)

7.3.2.2 Company() [2/2]

```
latex_curriculum_vitae.Company.Company (
            string coname )
```

This constructor will be used in case of we haven't a correct address for the company. It sets just the company name.

Parameters

coname	comes directly from gui txtCompanyName.Text (Contains companies name)

The documentation for this class was generated from the following file:

- C:/Users/Sasch/OneDrive/source/repos/Visual_Studio/latex_curriculum_vitae-dotnet/latex_curriculum_↩ vitae/Company.cs

7.4 latex_curriculum_vitae.Configuration Class Reference

This class is for configure the project.

Static Public Member Functions

- static string GetSetting (string key)

  This method gets a specific information from the config file specified by its key name.
- static void SetSetting (string key, string value)

  This method sets a specific information to the config file specified by its key name.
- static string GetVersionNumber ()

  Gets Assembly version number

7.4.1 Detailed Description

This class is for configure the project.

7.4.2 Member Function Documentation

7.4.2.1 GetSetting()

```
static string latex_curriculum_vitae.Configuration.GetSetting (
            string key )  [static]
```

This method gets a specific information from the config file specified by its key name.

Parameters

key	

Returns

string ConfigurationManager.AppSettings[key]

7.4.2.2 GetVersionNumber()

```
static string latex_curriculum_vitae.Configuration.GetVersionNumber ( )  [static]
```

Gets Assembly version number

7.4.2.3 SetSetting()

```
static void latex_curriculum_vitae.Configuration.SetSetting (
            string key,
            string value )  [static]
```

This method sets a specific information to the config file specified by its key name.

Parameters

key	
value	

The documentation for this class was generated from the following file:

- C:/Users/Sasch/OneDrive/source/repos/Visual_Studio/latex_curriculum_vitae-dotnet/latex_curriculum_↩ vitae/Configuration.cs

7.5 latex_curriculum_vitae.Constants Class Reference

Classes

- class CsvHeaders
- class General

The documentation for this class was generated from the following file:

- C:/Users/Sasch/OneDrive/source/repos/Visual_Studio/latex_curriculum_vitae-dotnet/latex_curriculum_↩ vitae/Constants.cs

7.6 latex_curriculum_vitae.Contact Class Reference

This class is for instancing a Contact object.

Public Member Functions

- Contact (string cname, string gname)

  This Constructor sets the arguments values to the Properties and instances the object.
- string Addressline (string company, string contactname, string cgender, string cstreet, int? czip, string ccity)

  This method combines the arguments to create a address string for using in the letter of application.

Properties

- string **Name** `[get, set]`
- string **Gender** `[get, set]`
- string **Salutation** `[get, set]`

Private Member Functions

- string GetSalutation (string cname, string gname)

  This method creates from the contact name and gender the right salutation. Ex. Dear Mr. Manns

7.6.1 Detailed Description

This class is for instancing a Contact object.

7.6.2 Constructor & Destructor Documentation

7.6.2.1 Contact()

```
latex_curriculum_vitae.Contact.Contact (
            string cname,
            string gname )
```

This Constructor sets the arguments values to the Properties and instances the object.

Parameters

cname	comes from the gui txtContactName.Text (Contains the name of the contact)
gname	comes from the gui (Contains the contacts gender)

7.6.3 Member Function Documentation

7.6.3.1 Addressline()

```
string latex_curriculum_vitae.Contact.Addressline (
            string company,
            string contactname,
            string cgender,
            string cstreet,
            int?  czip,
            string ccity )
```

This method combines the arguments to create a address string for using in the letter of application.

Parameters

company	comes from company.Name (Contains the company name)
contactname	comes from contact.Name (Contains the contact name)
cgender	comes from contact.Gender (Contains contacts gender)
cstreet	comes from company.Street (Contains companies street)
czip	comes from company.ZIP (contains companies zip)
ccity	comes from company.City (Contains companies city)

Returns

string addressline

7.6.3.2 GetSalutation()

```
string latex_curriculum_vitae.Contact.GetSalutation (
            string cname,
            string gname )  [private]
```

This method creates from the contact name and gender the right salutation. Ex. Dear Mr. Manns

Parameters

cname	comes from the gui txtContactName.Text (Contains the name of the contact)
gname	comes from the gui (Contains the contacts gender)

Returns

string salutation

The documentation for this class was generated from the following file:

- C:/Users/Sasch/OneDrive/source/repos/Visual_Studio/latex_curriculum_vitae-dotnet/latex_curriculum_↩ vitae/Contact.cs

7.7 latex_curriculum_vitae.CSVExport Class Reference

Static Public Member Functions

- static void **WriteCSV** (string company, string jobtitle, string city, string joburl)

The documentation for this class was generated from the following file:

- C:/Users/Sasch/OneDrive/source/repos/Visual_Studio/latex_curriculum_vitae-dotnet/latex_curriculum_↩ vitae/CSVExport.cs

7.8 latex_curriculum_vitae.Constants.CsvHeaders Class Reference

Static Public Attributes

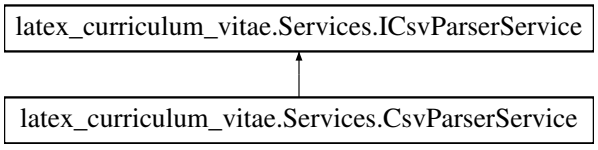
- const string **Company** = "Company"
- const string **Jobtitle** = "Jobtitle"
- const string **City** = "City"
- const string **Status** = "Status"
- const string **EmailSent** = "Email sent"
- const string **JobOfferUrl** = "Joboffer url"

The documentation for this class was generated from the following file:

- C:/Users/Sasch/OneDrive/source/repos/Visual_Studio/latex_curriculum_vitae-dotnet/latex_curriculum_↩ vitae/Constants.cs

7.9 latex_curriculum_vitae.Services.CsvParserService Class Reference

Inheritance diagram for latex_curriculum_vitae.Services.CsvParserService:



Public Member Functions

- List< JobApplicationModel > **ReadCsvFileToJobApplicationModel** (string path)
- void **WriteNewCsvFile** (string path, List< JobApplicationModel > jobApplicationModels)

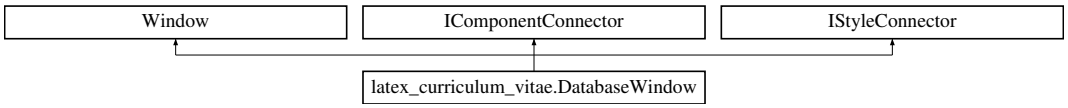
The documentation for this class was generated from the following file:

- C:/Users/Sasch/OneDrive/source/repos/Visual_Studio/latex_curriculum_vitae-dotnet/latex_curriculum_↩ vitae/Services/CsvParserService.cs

7.10 latex_curriculum_vitae.DatabaseWindow Class Reference

DatabaseWindow

Inheritance diagram for latex_curriculum_vitae.DatabaseWindow:



Public Member Functions

- void InitializeComponent ()

  InitializeComponent
- void InitializeComponent ()

  InitializeComponent
- void InitializeComponent ()

  InitializeComponent
- void InitializeComponent ()

  InitializeComponent
- void InitializeComponent ()

  InitializeComponent
- void InitializeComponent ()

  InitializeComponent
- void InitializeComponent ()

  InitializeComponent
- void InitializeComponent ()

  InitializeComponent
- void InitializeComponent ()

  InitializeComponent
- **DatabaseWindow** (JobApplicationDataDbContext context)

Private Member Functions

- void System.Windows.Markup.IComponentConnector. **Connect** (int connectionId, object target)
- void System.Windows.Markup.IStyleConnector. **Connect** (int connectionId, object target)
- void System.Windows.Markup.IComponentConnector. **Connect** (int connectionId, object target)
- void System.Windows.Markup.IStyleConnector. **Connect** (int connectionId, object target)

7.11 latex_curriculum_vitae.Email Class Reference

This class is for creating and sending job applications via email

Static Public Member Functions

- static void CreateMessage (string firstname, string familyname, string myemail, string contactname, string compemail, string subject, string salutation, string attachment, string smtpserver, string smtpuser, string smtppass, int smtpport)

  This is the main method for creating and sending emails. It doesn't returns anything.

7.11.1 Detailed Description

This class is for creating and sending job applications via email

7.11.2 Member Function Documentation

7.11.2.1 CreateMessage()

```
static void latex_curriculum_vitae.Email.CreateMessage (
            string firstname,
            string familyname,
            string myemail,
            string contactname,
            string compemail,
            string subject,
            string salutation,
            string attachment,
            string smtpserver,
            string smtpuser,
            string smtppass,
            int smtpport )  [static]
```

This is the main method for creating and sending emails. It doesn't returns anything.

Parameters

firstname	comes from myuser.Firstname
familyname	comes from myuser.Familyname
myemail	comes from myuser.Email
contactname	comes from contact.Name
compemail	comes from myapplication.Email
subject	comes originally from Build.GetEmailSubject
salutation	comes from contact.Salutation
attachment	comes from Build.GetFinalPdfName
smtpserver	comes from myuser.SmtpServer
smtpuser	comes from myuser.SmtpUser
smtppass	comes from myuser.SmtpPass
smtpport	myuser.SmtpPort

The documentation for this class was generated from the following file:

- C:/Users/Sasch/OneDrive/source/repos/Visual_Studio/latex_curriculum_vitae-dotnet/latex_curriculum_↩ vitae/Email.cs

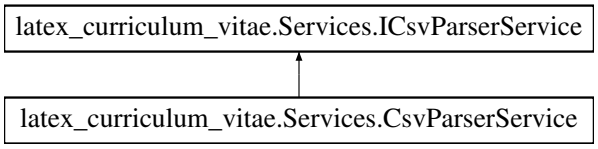
7.12 latex_curriculum_vitae.Constants.General Class Reference

The documentation for this class was generated from the following file:

- C:/Users/Sasch/OneDrive/source/repos/Visual_Studio/latex_curriculum_vitae-dotnet/latex_curriculum_↩ vitae/Constants.cs

7.13 latex_curriculum_vitae.Services.ICsvParserService Interface Reference

Inheritance diagram for latex_curriculum_vitae.Services.ICsvParserService:



Public Member Functions

- List< JobApplicationModel > **ReadCsvFileToJobApplicationModel** (string path)
- void **WriteNewCsvFile** (string path, List< JobApplicationModel > jobApplicationModels)

The documentation for this interface was generated from the following file:

- C:/Users/Sasch/OneDrive/source/repos/Visual_Studio/latex_curriculum_vitae-dotnet/latex_curriculum_↩ vitae/Services/ICsvParserService.cs

7.14 latex_curriculum_vitae.JobApplication Class Reference

This is a class for instancing the JobApplication object

Public Member Functions

- JobApplication (string aurl, string aemail, string ajobtitle)

  That Constructor creates the JobApplication object by using the arguments.

- string FixJobApplication (string ajobtitle)

  This method gets the jobtitle and escapes the hash symbol and the ampersand. Otherwise it breaks the LaTEX build.
- async void **UseBitLy** (string apkikey, string url)

Properties

- string **URL** `[get, set]`
- string **Email** `[get, set]`
- string **Jobtitle** `[get, set]`
- string **SubjectPrefix** `[get, set]`

7.14.1 Detailed Description

This is a class for instancing the JobApplication object

7.14.2 Constructor & Destructor Documentation

7.14.2.1 JobApplication()

```
latex_curriculum_vitae.JobApplication.JobApplication (
            string aurl,
            string aemail,
            string ajobtitle )
```

That Constructor creates the JobApplication object by using the arguments.

Parameters

aurl	comes directly from the gui txtUrl.Text
aemail	comes directly from the gui txtEmail.Text
ajobtitle	comes directly from the gui txtJobtitle.Text

7.14.3 Member Function Documentation

7.14.3.1 FixJobApplication()

```
string latex_curriculum_vitae.JobApplication.FixJobApplication (
            string ajobtitle )
```

This method gets the jobtitle and escapes the hash symbol and the ampersand. Otherwise it breaks the LaTEX build.

Parameters

ajobtitle	comes from the constructor.

Returns

The documentation for this class was generated from the following file:

- C:/Users/Sasch/OneDrive/source/repos/Visual_Studio/latex_curriculum_vitae-dotnet/latex_curriculum_↩ vitae/JobApplication.cs

7.15 latex_curriculum_vitae.Data.JobApplicationData Class Reference

Properties

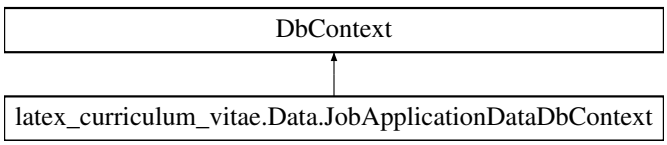
- int **Id** `[get, set]`
- string **Company** `[get, set]`
- string **Jobtitle** `[get, set]`
- string **City** `[get, set]`
- string **ContactName** `[get, set]`
- string **Status** `[get, set]`
- DateTime **EmailSent** `[get, set]`
- DateTime **EmailConfirmation** `[get, set]`
- DateTime **LastPhonecall** `[get, set]`
- DateTime **JobInterview** `[get, set]`
- string **JobOfferUrl** `[get, set]`

The documentation for this class was generated from the following file:

- C:/Users/Sasch/OneDrive/source/repos/Visual_Studio/latex_curriculum_vitae-dotnet/latex_curriculum_↩ vitae/Data/JobApplicationData.cs

7.16 latex_curriculum_vitae.Data.JobApplicationDataDbContext Class Reference

Inheritance diagram for latex_curriculum_vitae.Data.JobApplicationDataDbContext:



Public Member Functions

- **JobApplicationDataDbContext** (DbContextOptions< JobApplicationDataDbContext > options)

Protected Member Functions

- override void **OnModelCreating** (ModelBuilder modelBuilder)

Properties

- DbSet< JobApplicationData > **JobApplications** `[get, set]`

Private Member Functions

- JobApplicationData[ ] **GetJobApplications** ()

The documentation for this class was generated from the following file:

- void System.Windows.Markup.IComponentConnector. **Connect** (int connectionId, object target)

Private Attributes

- bool **_contentLoaded**
- ServiceProvider **serviceProvider**

7.19.1 Detailed Description

MainWindow

Interaction logic for MainWindow.xaml

7.19.2 Member Function Documentation

7.19.2.1 InitializeComponent() [1/10]

```
void latex_curriculum_vitae.MainWindow.InitializeComponent ( )
```

InitializeComponent

7.19.2.2 InitializeComponent() [2/10]

```
void latex_curriculum_vitae.MainWindow.InitializeComponent ( )
```

InitializeComponent

7.19.2.3 InitializeComponent() [3/10]

```
void latex_curriculum_vitae.MainWindow.InitializeComponent ( )
```

InitializeComponent

7.19.2.4 InitializeComponent() [4/10]

```
void latex_curriculum_vitae.MainWindow.InitializeComponent ( )
```

InitializeComponent

7.19.2.5 InitializeComponent() [5/10]

```
void latex_curriculum_vitae.MainWindow.InitializeComponent ( )
```

InitializeComponent

7.19.2.6 InitializeComponent() [6/10]

```
void latex_curriculum_vitae.MainWindow.InitializeComponent ( )
```

InitializeComponent

7.19.2.7 InitializeComponent() [7/10]

```
void latex_curriculum_vitae.MainWindow.InitializeComponent ( )
```

InitializeComponent

7.19.2.8 InitializeComponent() [8/10]

```
void latex_curriculum_vitae.MainWindow.InitializeComponent ( )
```

InitializeComponent

7.19.2.9 InitializeComponent() [9/10]

```
void latex_curriculum_vitae.MainWindow.InitializeComponent ( )
```

InitializeComponent

7.19.2.10 InitializeComponent() [10/10]

```
void latex_curriculum_vitae.MainWindow.InitializeComponent ( )
```

InitializeComponent

7.20 latex_curriculum_vitae.Properties.Resources Class Reference

Eine stark typisierte Ressourcenklasse zum Suchen von lokalisierten Zeichenfolgen usw.

Properties

- static global::System.Resources.ResourceManager ResourceManager `[get]`

  Gibt die zwischengespeicherte ResourceManager-Instanz zurück, die von dieser Klasse verwendet wird.
- static global::System.Globalization.CultureInfo Culture `[get, set]`

  Überschreibt die CurrentUICulture-Eigenschaft des aktuellen Threads für alle Ressourcenzuordnungen, die diese stark typisierte Ressourcenklasse verwenden.
- static string AddressFemale `[get]`

  Sucht eine lokalisierte Zeichenfolge, die Mrs ähnelt.
- static string AddressMale `[get]`

  Sucht eine lokalisierte Zeichenfolge, die Mr ähnelt.
- static string AppDoc `[get]`

  Sucht eine lokalisierte Zeichenfolge, die Application_documents_ ähnelt.
- static string BtnExit `[get]`

  Sucht eine lokalisierte Zeichenfolge, die Close ähnelt.
- static string Cert `[get]`

  Sucht eine lokalisierte Zeichenfolge, die Additional_Certificates_ ähnelt.
- static string Cos `[get]`

  Sucht eine lokalisierte Zeichenfolge, die Job_References_ ähnelt.
- static string CsvEmailSent `[get]`

  Sucht eine lokalisierte Zeichenfolge, die Email sent ähnelt.
- static string DwAddApplication `[get]`

  Sucht eine lokalisierte Zeichenfolge, die Add Application ähnelt.
- static string DwAddNewApplication `[get]`

  Sucht eine lokalisierte Zeichenfolge, die New application ähnelt.
- static string DwApplicationId `[get]`

  Sucht eine lokalisierte Zeichenfolge, die Application Id ähnelt.
- static string DwCity `[get]`

  Sucht eine lokalisierte Zeichenfolge, die City ähnelt.
- static string DwCompany `[get]`

  Sucht eine lokalisierte Zeichenfolge, die Company ähnelt.
- static string DwConfirmed `[get]`

  Sucht eine lokalisierte Zeichenfolge, die Confirmed ähnelt.
- static string DwContact `[get]`

  Sucht eine lokalisierte Zeichenfolge, die Contact ähnelt.
- static string DwDeleteApplication `[get]`

  Sucht eine lokalisierte Zeichenfolge, die Delete Application ähnelt.
- static string DwEditApplication `[get]`

  Sucht eine lokalisierte Zeichenfolge, die Edit Application ähnelt.
- static string DwHeader `[get]`

  Sucht eine lokalisierte Zeichenfolge, die Exlore the state of your Job Applications ähnelt.
- static string DwHeader1 `[get]`

  Sucht eine lokalisierte Zeichenfolge, die The current status of your job applications ähnelt.
- static string DwInvited `[get]`

  Sucht eine lokalisierte Zeichenfolge, die Invited ähnelt.
- static string DwJobinterview `[get]`

Sucht eine lokalisierte Zeichenfolge, die Jobinterview ähnelt.

- static string DwJobOfferUrl [get]

  Sucht eine lokalisierte Zeichenfolge, die Job offer url ähnelt.
- static string DwJobtitle [get]

  Sucht eine lokalisierte Zeichenfolge, die Jobtitle ähnelt.
- static string DwLastPhoneCall [get]

  Sucht eine lokalisierte Zeichenfolge, die Last phone call ähnelt.
- static string DwRefused [get]

  Sucht eine lokalisierte Zeichenfolge, die Refuesed ähnelt.
- static string DwSent [get]

  Sucht eine lokalisierte Zeichenfolge, die Sent ähnelt.
- static string DwStatus [get]

  Sucht eine lokalisierte Zeichenfolge, die Status ähnelt.
- static string EmailHTML [get]

  *Sucht eine lokalisierte Zeichenfolge, die {0}
 I am sending you my application documents attached.
 Sincerly {1}
 <img src=""cid:{2}"" width=""10%""> ähnelt.*
- static string EmailNotSet [get]

  Sucht eine lokalisierte Zeichenfolge, die You haven't set all needed fields for sending emails. I open for you the Usersettings Window. ähnelt.
- static string EmailNotSetHeader [get]

  Sucht eine lokalisierte Zeichenfolge, die Can't send email. ähnelt.
- static string EmailPlain [get]

  Sucht eine lokalisierte Zeichenfolge, die {0}
- static string EnumStatus0 [get]

  Sucht eine lokalisierte Zeichenfolge, die Sent ähnelt.
- static string EnumStatus1 [get]

  Sucht eine lokalisierte Zeichenfolge, die Confirmed ähnelt.
- static string EnumStatus2 [get]

  Sucht eine lokalisierte Zeichenfolge, die Invited ähnelt.
- static string EnumStatus3 [get]

  Sucht eine lokalisierte Zeichenfolge, die Rejected ähnelt.
- static string GenderFemale [get]

  Sucht eine lokalisierte Zeichenfolge, die Female ähnelt.
- static string GenderMale [get]

  Sucht eine lokalisierte Zeichenfolge, die Male ähnelt.
- static string GenderUnknown [get]

  Sucht eine lokalisierte Zeichenfolge, die Unknown ähnelt.
- static string HRDepartment [get]

  Sucht eine lokalisierte Zeichenfolge, die HR department ähnelt.
- static string MsgDirFinalPdf [get]

  Sucht eine lokalisierte Zeichenfolge, die Now i open for you the directory in the explorer, what contains your PDFs. ähnelt.
- static string MsgEmailSent [get]

  Sucht eine lokalisierte Zeichenfolge, die Your email is now sent. You can do the next job application. ähnelt.
- static string MsgHeaderInfo [get]

  Sucht eine lokalisierte Zeichenfolge, die Information ähnelt.
- static string MsgSetupCheckConfig [get]

  Sucht eine lokalisierte Zeichenfolge, die You starting the app the first time. Please add your user settings in the window. ähnelt.
- static string MsgSetupCheckConfigHeader [get]

  Sucht eine lokalisierte Zeichenfolge, die Check Configuration ähnelt.

- static string MsgSetupCheckDocument [get]

  Sucht eine lokalisierte Zeichenfolge, die Please close the App and follow the documentation. I open it for you. ähnelt.
- static string MsgSetupCheckDocumentHeader [get]

  Sucht eine lokalisierte Zeichenfolge, die Check documents path ähnelt.
- static string MsgSetupCheckDocumentsCopy [get]

  Sucht eine lokalisierte Zeichenfolge, die You starting the app the first time. I prepare now the directory structure and copy the needed files to: ähnelt.
- static string MsgSetupCheckLatex [get]

  Sucht eine lokalisierte Zeichenfolge, die I haven't found TeXLive. Now i open a Browser, where you can download it. Please close this app and install TexLive. ähnelt.
- static string MsgSetupCheckLatexHeader [get]

  Sucht eine lokalisierte Zeichenfolge, die Check LaTEX ähnelt.
- static string MWGoDatabase [get]

  Sucht eine lokalisierte Zeichenfolge, die Open Database ähnelt.
- static string MWStartWriteJobApplication [get]

  Sucht eine lokalisierte Zeichenfolge, die Write your Job-Application ähnelt.
- static string MWTitle [get]

  Sucht eine lokalisierte Zeichenfolge, die Main Menue ähnelt.
- static string MWUsersettings [get]

  Sucht eine lokalisierte Zeichenfolge, die View or Change User Settings ähnelt.
- static string SalutationFemale [get]

  Sucht eine lokalisierte Zeichenfolge, die Dear Mrs ähnelt.
- static string SalutationMale [get]

  Sucht eine lokalisierte Zeichenfolge, die Dear Mr ähnelt.
- static string SalutationUnknown [get]

  Sucht eine lokalisierte Zeichenfolge, die Dear Sir or Madam ähnelt.
- static string Subjectprefix [get]

  Sucht eine lokalisierte Zeichenfolge, die Application as ähnelt.
- static string UsBitLyToken [get]

  Sucht eine lokalisierte Zeichenfolge, die Bit.Ly Token: ähnelt.
- static string UsBlog [get]

  Sucht eine lokalisierte Zeichenfolge, die Your Blog: ähnelt.
- static string UsBtnSave [get]

  Sucht eine lokalisierte Zeichenfolge, die Save ähnelt.
- static string UsEmailaddress [get]

  Sucht eine lokalisierte Zeichenfolge, die Your Emailaddress: ähnelt.
- static string UsEmailSettings [get]

  Sucht eine lokalisierte Zeichenfolge, die Email settings ähnelt.
- static string UsFamilyname [get]

  Sucht eine lokalisierte Zeichenfolge, die Your Familyname: ähnelt.
- static string UsFirstname [get]

  Sucht eine lokalisierte Zeichenfolge, die Your Firstname: ähnelt.
- static string UsHeader [get]

  Sucht eine lokalisierte Zeichenfolge, die Your User settings ähnelt.
- static string UsPersonalSettings [get]

  Sucht eine lokalisierte Zeichenfolge, die Personal Settings ähnelt.
- static string UsPhonenumber [get]

  Sucht eine lokalisierte Zeichenfolge, die Your Phonenumber: ähnelt.
- static string UsSmtpPassword [get]

  Sucht eine lokalisierte Zeichenfolge, die SMTP-Password: ähnelt.
- static string UsSmtpPort [get]

Sucht eine lokalisierte Zeichenfolge, die SMTP-Port: ähnelt.

- static string UsSmtpServer [get]

  Sucht eine lokalisierte Zeichenfolge, die SMTP-Server: ähnelt.
- static string UsSmtpUser [get]

  Sucht eine lokalisierte Zeichenfolge, die SMTP-Username: ähnelt.
- static string UsStreet [get]

  Sucht eine lokalisierte Zeichenfolge, die Your Address: ähnelt.
- static string UsTitle [get]

  Sucht eine lokalisierte Zeichenfolge, die User Settings ähnelt.
- static string UsZipCity [get]

  Sucht eine lokalisierte Zeichenfolge, die Your ZIP and City: ähnelt.
- static string WJAApplication [get]

  Sucht eine lokalisierte Zeichenfolge, die Application details ähnelt.
- static string WJABtnConfig [get]

  Sucht eine lokalisierte Zeichenfolge, die Configuration ähnelt.
- static string WJABtnDatabase [get]

  Sucht eine lokalisierte Zeichenfolge, die Database ähnelt.
- static string WJABtnGenerate [get]

  Sucht eine lokalisierte Zeichenfolge, die Generate ähnelt.
- static string WJACity [get]

  Sucht eine lokalisierte Zeichenfolge, die City: ähnelt.
- static string WJACompanyDetails [get]

  Sucht eine lokalisierte Zeichenfolge, die Companydetails ähnelt.
- static string WJACompanyName [get]

  Sucht eine lokalisierte Zeichenfolge, die Company Name: ähnelt.
- static string WJACompanyStreet [get]

  Sucht eine lokalisierte Zeichenfolge, die Companies Street: ähnelt.
- static string WJAContact [get]

  Sucht eine lokalisierte Zeichenfolge, die Contact person ähnelt.
- static string WJAContactName [get]

  Sucht eine lokalisierte Zeichenfolge, die Name: ähnelt.
- static string WJAEmail [get]

  Sucht eine lokalisierte Zeichenfolge, die Emailaddress: ähnelt.
- static string WJAGender [get]

  Sucht eine lokalisierte Zeichenfolge, die Gender: ähnelt.
- static string WJAHeader [get]

  Sucht eine lokalisierte Zeichenfolge, die Write your Job Applications ähnelt.
- static string WJAInitiative [get]

  Sucht eine lokalisierte Zeichenfolge, die Initiative application as ähnelt.
- static string WJAInitiativeLabel [get]

  Sucht eine lokalisierte Zeichenfolge, die Initiative application ähnelt.
- static string WJAJobtitle [get]

  Sucht eine lokalisierte Zeichenfolge, die Jobtitle: ähnelt.
- static string WJAUrl [get]

  Sucht eine lokalisierte Zeichenfolge, die URL: ähnelt.
- static string WJAZip [get]

  Sucht eine lokalisierte Zeichenfolge, die ZIP Code: ähnelt.

Static Private Attributes

- static global::System.Resources.ResourceManager **resourceMan**
- static global::System.Globalization.CultureInfo **resourceCulture**

7.20.1 Detailed Description

Eine stark typisierte Ressourcenklasse zum Suchen von lokalisierten Zeichenfolgen usw.

7.20.2 Property Documentation

7.20.2.1 AddressFemale

```
string latex_curriculum_vitae.Properties.Resources.AddressFemale  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Mrs ähnelt.

7.20.2.2 AddressMale

```
string latex_curriculum_vitae.Properties.Resources.AddressMale  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Mr ähnelt.

7.20.2.3 AppDoc

```
string latex_curriculum_vitae.Properties.Resources.AppDoc  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Application_documents_ ähnelt.

7.20.2.4 BtnExit

```
string latex_curriculum_vitae.Properties.Resources.BtnExit  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Close ähnelt.

7.20.2.5 Cert

```
string latex_curriculum_vitae.Properties.Resources.Cert  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Additional_Certificates_ ähnelt.

7.20.2.6 Cos

```
string latex_curriculum_vitae.Properties.Resources.Cos  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Job_References_ ähnelt.

7.20.2.7 CsvEmailSent

```
string latex_curriculum_vitae.Properties.Resources.CsvEmailSent  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Email sent ähnelt.

7.20.2.8 Culture

```
global.System.Globalization.CultureInfo latex_curriculum_vitae.Properties.Resources.Culture
[static], [get], [set]
```

Überschreibt die CurrentUICulture-Eigenschaft des aktuellen Threads für alle Ressourcenzuordnungen, die diese stark typisierte Ressourcenklasse verwenden.

7.20.2.9 DwAddApplication

```
string latex_curriculum_vitae.Properties.Resources.DwAddApplication  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Add Application ähnelt.

7.20.2.10 DwAddNewApplication

```
string latex_curriculum_vitae.Properties.Resources.DwAddNewApplication  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die New application ähnelt.

7.20.2.11 DwApplicationId

```
string latex_curriculum_vitae.Properties.Resources.DwApplicationId  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Application Id ähnelt.

7.20.2.12 DwCity

```
string latex_curriculum_vitae.Properties.Resources.DwCity  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die City ähnelt.

7.20.2.13 DwCompany

```
string latex_curriculum_vitae.Properties.Resources.DwCompany  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Company ähnelt.

7.20.2.14 DwConfirmed

```
string latex_curriculum_vitae.Properties.Resources.DwConfirmed  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Confirmed ähnelt.

7.20.2.15 DwContact

```
string latex_curriculum_vitae.Properties.Resources.DwContact  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Contact ähnelt.

7.20.2.16 DwDeleteApplication

```
string latex_curriculum_vitae.Properties.Resources.DwDeleteApplication  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Delete Application ähnelt.

7.20.2.17 DwEditApplication

```
string latex_curriculum_vitae.Properties.Resources.DwEditApplication  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Edit Application ähnelt.

7.20.2.18 DwHeader

```
string latex_curriculum_vitae.Properties.Resources.DwHeader [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Exlore the state of your Job Applications ähnelt.

7.20.2.19 DwHeader1

```
string latex_curriculum_vitae.Properties.Resources.DwHeader1 [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die The current status of your job applications ähnelt.

7.20.2.20 DwInvited

```
string latex_curriculum_vitae.Properties.Resources.DwInvited [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Invited ähnelt.

7.20.2.21 DwJobinterview

```
string latex_curriculum_vitae.Properties.Resources.DwJobinterview [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Jobinterview ähnelt.

7.20.2.22 DwJobOfferUrl

```
string latex_curriculum_vitae.Properties.Resources.DwJobOfferUrl [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Job offer url ähnelt.

7.20.2.23 DwJobtitle

```
string latex_curriculum_vitae.Properties.Resources.DwJobtitle [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Jobtitle ähnelt.

7.20.2.24 DwLastPhoneCall

```
string latex_curriculum_vitae.Properties.Resources.DwLastPhoneCall  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Last phone call ähnelt.

7.20.2.25 DwRefused

```
string latex_curriculum_vitae.Properties.Resources.DwRefused  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Refuesed ähnelt.

7.20.2.26 DwSent

```
string latex_curriculum_vitae.Properties.Resources.DwSent  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Sent ähnelt.

7.20.2.27 DwStatus

```
string latex_curriculum_vitae.Properties.Resources.DwStatus  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Status ähnelt.

7.20.2.28 EmailHTML

```
string latex_curriculum_vitae.Properties.Resources.EmailHTML  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die {0}
 I am sending you my application documents attached.
 Sincerly {1}
 <img src=""cid:{2}"" width=""10%""> ähnelt.

7.20.2.29 EmailNotSet

```
string latex_curriculum_vitae.Properties.Resources.EmailNotSet  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die You haven't set all needed fields for sending emails. I open for you the Usersettings Window. ähnelt.

7.20.2.30 EmailNotSetHeader

```
string latex_curriculum_vitae.Properties.Resources.EmailNotSetHeader  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Can't send email. ähnelt.

7.20.2.31 EmailPlain

```
string latex_curriculum_vitae.Properties.Resources.EmailPlain  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die {0}

I am sending you my application documents attached.

Sincerely {1} ähnelt.

7.20.2.32 EnumStatus0

```
string latex_curriculum_vitae.Properties.Resources.EnumStatus0  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Sent ähnelt.

7.20.2.33 EnumStatus1

```
string latex_curriculum_vitae.Properties.Resources.EnumStatus1  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Confirmed ähnelt.

7.20.2.34 EnumStatus2

```
string latex_curriculum_vitae.Properties.Resources.EnumStatus2  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Invited ähnelt.

7.20.2.35 EnumStatus3

```
string latex_curriculum_vitae.Properties.Resources.EnumStatus3  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Rejected ähnelt.

7.20.2.36 GenderFemale

```
string latex_curriculum_vitae.Properties.Resources.GenderFemale  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Female ähnelt.

7.20.2.37 GenderMale

```
string latex_curriculum_vitae.Properties.Resources.GenderMale  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Male ähnelt.

7.20.2.38 GenderUnknown

```
string latex_curriculum_vitae.Properties.Resources.GenderUnknown  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Unknown ähnelt.

7.20.2.39 HRDepartment

```
string latex_curriculum_vitae.Properties.Resources.HRDepartment  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die HR department ähnelt.

7.20.2.40 MsgDirFinalPdf

```
string latex_curriculum_vitae.Properties.Resources.MsgDirFinalPdf  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Now i open for you the directory in the explorer, what contains your PDFs. ähnelt.

7.20.2.41 MsgEmailSent

```
string latex_curriculum_vitae.Properties.Resources.MsgEmailSent  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Your email is now sent. You can do the next job application. ähnelt.

7.20.2.42 MsgHeaderInfo

```
string latex_curriculum_vitae.Properties.Resources.MsgHeaderInfo  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Information ähnelt.

7.20.2.43 MsgSetupCheckConfig

```
string latex_curriculum_vitae.Properties.Resources.MsgSetupCheckConfig  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die You starting the app the first time. Please add your user settings in the window. ähnelt.

7.20.2.44 MsgSetupCheckConfigHeader

```
string latex_curriculum_vitae.Properties.Resources.MsgSetupCheckConfigHeader  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Check Configuration ähnelt.

7.20.2.45 MsgSetupCheckDocument

```
string latex_curriculum_vitae.Properties.Resources.MsgSetupCheckDocument  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Please close the App and follow the documentation. I open it for you. ähnelt.

7.20.2.46 MsgSetupCheckDocumentHeader

```
string latex_curriculum_vitae.Properties.Resources.MsgSetupCheckDocumentHeader  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Check documents path ähnelt.

7.20.2.47 MsgSetupCheckDocumentsCopy

```
string latex_curriculum_vitae.Properties.Resources.MsgSetupCheckDocumentsCopy  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die You starting the app the first time. I prepare now the directory structure and copy the needed files to: ähnelt.

7.20.2.48 MsgSetupCheckLatex

```
string latex_curriculum_vitae.Properties.Resources.MsgSetupCheckLatex  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die I haven't found TeXLive. Now i open a Browser, where you can download it. Please close this app and install TexLive. ähnelt.

7.20.2.49 MsgSetupCheckLatexHeader

```
string latex_curriculum_vitae.Properties.Resources.MsgSetupCheckLatexHeader  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Check LaTEX ähnelt.

7.20.2.50 MWGoDatabase

```
string latex_curriculum_vitae.Properties.Resources.MWGoDatabase  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Open Database ähnelt.

7.20.2.51 MWStartWriteJobApplication

```
string latex_curriculum_vitae.Properties.Resources.MWStartWriteJobApplication  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Write your Job-Application ähnelt.

7.20.2.52 MWTitle

```
string latex_curriculum_vitae.Properties.Resources.MWTitle  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Main Menue ähnelt.

7.20.2.53 MWUsersettings

```
string latex_curriculum_vitae.Properties.Resources.MWUsersettings  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die View or Change User Settings ähnelt.

7.20.2.54 ResourceManager

```
global.System.Resources.ResourceManager latex_curriculum_vitae.Properties.Resources.Resource↩
Manager  [static], [get]
```

Gibt die zwischengespeicherte ResourceManager-Instanz zurück, die von dieser Klasse verwendet wird.

7.20.2.55 SalutationFemale

```
string latex_curriculum_vitae.Properties.Resources.SalutationFemale  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Dear Mrs ähnelt.

7.20.2.56 SalutationMale

```
string latex_curriculum_vitae.Properties.Resources.SalutationMale  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Dear Mr ähnelt.

7.20.2.57 SalutationUnknown

```
string latex_curriculum_vitae.Properties.Resources.SalutationUnknown  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Dear Sir or Madam ähnelt.

7.20.2.58 Subjectprefix

```
string latex_curriculum_vitae.Properties.Resources.Subjectprefix  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Application as ähnelt.

7.20.2.59 UsBitLyToken

```
string latex_curriculum_vitae.Properties.Resources.UsBitLyToken  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Bit.Ly Token: ähnelt.

7.20.2.60 UsBlog

```
string latex_curriculum_vitae.Properties.Resources.UsBlog  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Your Blog: ähnelt.

7.20.2.61 UsBtnSave

```
string latex_curriculum_vitae.Properties.Resources.UsBtnSave  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Save ähnelt.

7.20.2.62 UsEmailaddress

```
string latex_curriculum_vitae.Properties.Resources.UsEmailaddress  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Your Emailaddress: ähnelt.

7.20.2.63 UsEmailSettings

```
string latex_curriculum_vitae.Properties.Resources.UsEmailSettings  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Email settings ähnelt.

7.20.2.64 UsFamilyname

```
string latex_curriculum_vitae.Properties.Resources.UsFamilyname  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Your Familyname: ähnelt.

7.20.2.65 UsFirstname

```
string latex_curriculum_vitae.Properties.Resources.UsFirstname  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Your Firstname: ähnelt.

7.20.2.66 UsHeader

```
string latex_curriculum_vitae.Properties.Resources.UsHeader  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Your User settings ähnelt.

7.20.2.67 UsPersonalSettings

```
string latex_curriculum_vitae.Properties.Resources.UsPersonalSettings  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Personal Settings ähnelt.

7.20.2.68 UsPhonenumber

```
string latex_curriculum_vitae.Properties.Resources.UsPhonenumber  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Your Phonenumber: ähnelt.

7.20.2.69 UsSmtpPassword

```
string latex_curriculum_vitae.Properties.Resources.UsSmtpPassword  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die SMTP-Password: ähnelt.

7.20.2.70 UsSmtpPort

```
string latex_curriculum_vitae.Properties.Resources.UsSmtpPort  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die SMTP-Port: ähnelt.

7.20.2.71 UsSmtpServer

```
string latex_curriculum_vitae.Properties.Resources.UsSmtpServer  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die SMTP-Server: ähnelt.

7.20.2.72 UsSmtpUser

```
string latex_curriculum_vitae.Properties.Resources.UsSmtpUser  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die SMTP-Username: ähnelt.

7.20.2.73 UsStreet

```
string latex_curriculum_vitae.Properties.Resources.UsStreet  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Your Address: ähnelt.

7.20.2.74 UsTitle

```
string latex_curriculum_vitae.Properties.Resources.UsTitle  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die User Settings ähnelt.

7.20.2.75 UsZipCity

```
string latex_curriculum_vitae.Properties.Resources.UsZipCity  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Your ZIP and City: ähnelt.

7.20.2.76 WJAApplication

```
string latex_curriculum_vitae.Properties.Resources.WJAApplication  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Application details ähnelt.

7.20.2.77 WJABtnConfig

```
string latex_curriculum_vitae.Properties.Resources.WJABtnConfig  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Configuration ähnelt.

7.20.2.78 WJABtnDatabase

```
string latex_curriculum_vitae.Properties.Resources.WJABtnDatabase [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Database ähnelt.

7.20.2.79 WJABtnGenerate

```
string latex_curriculum_vitae.Properties.Resources.WJABtnGenerate [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Generate ähnelt.

7.20.2.80 WJACity

```
string latex_curriculum_vitae.Properties.Resources.WJACity [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die City: ähnelt.

7.20.2.81 WJACompanyDetails

```
string latex_curriculum_vitae.Properties.Resources.WJACompanyDetails [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Companydetails ähnelt.

7.20.2.82 WJACompanyName

```
string latex_curriculum_vitae.Properties.Resources.WJACompanyName [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Company Name: ähnelt.

7.20.2.83 WJACompanyStreet

```
string latex_curriculum_vitae.Properties.Resources.WJACompanyStreet [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Companies Street: ähnelt.

7.20.2.84 WJAContact

```
string latex_curriculum_vitae.Properties.Resources.WJAContact  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Contact person ähnelt.

7.20.2.85 WJAContactName

```
string latex_curriculum_vitae.Properties.Resources.WJAContactName  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Name: ähnelt.

7.20.2.86 WJAEmail

```
string latex_curriculum_vitae.Properties.Resources.WJAEmail  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Emailaddress: ähnelt.

7.20.2.87 WJAGender

```
string latex_curriculum_vitae.Properties.Resources.WJAGender  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Gender: ähnelt.

7.20.2.88 WJAHeader

```
string latex_curriculum_vitae.Properties.Resources.WJAHeader  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Write your Job Applications ähnelt.

7.20.2.89 WJAInitiative

```
string latex_curriculum_vitae.Properties.Resources.WJAInitiative  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Initiative application as ähnelt.

7.20.2.90 WJAInitiativeLabel

```
string latex_curriculum_vitae.Properties.Resources.WJAInitiativeLabel  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Initiative application ähnelt.

7.20.2.91 WJAJobtitle

```
string latex_curriculum_vitae.Properties.Resources.WJAJobtitle  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die Jobtitle: ähnelt.

7.20.2.92 WJAUrl

```
string latex_curriculum_vitae.Properties.Resources.WJAUrl  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die URL: ähnelt.

7.20.2.93 WJAZip

```
string latex_curriculum_vitae.Properties.Resources.WJAZip  [static], [get]
```

Sucht eine lokalisierte Zeichenfolge, die ZIP Code: ähnelt.

The documentation for this class was generated from the following file:

- C:/Users/Sasch/OneDrive/source/repos/Visual_Studio/latex_curriculum_vitae-dotnet/latex_curriculum_↩ vitae/Properties/Resources.Designer.cs

7.21 latex_curriculum_vitae.Setup Class Reference

This class contains methods for doing the setup

Static Public Member Functions

- static void CheckAppConfig ()

  This method checks, if the config file is already present. Otherwise it launches the UserSettings Window.
- static void CheckLatexPath ()

  This method checks, if LaTEX is already installed. Otherwise it opens the installation website.
- static void CheckDocumentsPath ()

  This method copies by the first run a couple of files to the AppData directory.
- static void GetOnlineDocumentation ()

  This method launches the online documentation.
- static void **GetOnlineDocumentation** (string target)
- static void Cleanup ()

  This method cleans up the temporary directory.

Static Private Member Functions

- static void CreateDocumentsPath ()

  This method just creates the directory structure, what lcv expected.
- static void CopyDocuments ()

  This method copies a couple of needed files to the AppData directory.

Static Private Attributes

- static readonly string **appDataPath** = Environment.GetFolderPath(Environment.SpecialFolder.Application↩ Data)

7.21.1 Detailed Description

This class contains methods for doing the setup

7.21.2 Member Function Documentation

7.21.2.1 CheckAppConfig()

```
static void latex_curriculum_vitae.Setup.CheckAppConfig ( )  [static]
```

This method checks, if the config file is already present. Otherwise it launches the UserSettings Window.

7.21.2.2 CheckDocumentsPath()

```
static void latex_curriculum_vitae.Setup.CheckDocumentsPath ( )  [static]
```

This method copies by the first run a couple of files to the AppData directory.

7.21.2.3 CheckLatexPath()

```
static void latex_curriculum_vitae.Setup.CheckLatexPath ( )  [static]
```

This method checks, if LaTEX is already installed. Otherwise it opens the installation website.

7.21.2.4 Cleanup()

```
static void latex_curriculum_vitae.Setup.Cleanup ( )  [static]
```

This method cleans up the temporary directory.

7.21.2.5 CopyDocuments()

```
static void latex_curriculum_vitae.Setup.CopyDocuments ( )  [static], [private]
```

This method copies a couple of needed files to the AppData directory.

7.21.2.6 CreateDocumentsPath()

```
static void latex_curriculum_vitae.Setup.CreateDocumentsPath ( )  [static], [private]
```

This method just creates the directory structure, what lcv expected.

7.21.2.7 GetOnlineDocumentation()

```
static void latex_curriculum_vitae.Setup.GetOnlineDocumentation ( )  [static]
```

This method launches the online documentation.

The documentation for this class was generated from the following file:

- C:/Users/Sasch/OneDrive/source/repos/Visual_Studio/latex_curriculum_vitae-dotnet/latex_curriculum_↩ vitae/Setup.cs

7.22 latex_curriculum_vitae.User Class Reference

This class instances the User object.

Public Member Functions

- User ()

  That constructor uses the config file to set up all user relevant information.

Properties

- string **Firstname** `[get, set]`
- string **Familyname** `[get, set]`
- string **Street** `[get, set]`
- string **City** `[get, set]`
- string **Phone** `[get, set]`
- string **Email** `[get, set]`
- string **Blog** `[get, set]`
- string **SmtpServer** `[get, set]`
- string **SmtpUser** `[get, set]`
- string **SmtpPass** `[get, set]`
- int **SmtpPort** `[get, set]`
- string **BitLyToken** `[get, set]`

Private Member Functions

- void UserFile ()

  This method uses the information from the Properties to create the LaTEX user configuration file "personal_data.tex" what will be used by letter of application and also for curriculum_vitae.

7.22.1 Detailed Description

This class instances the User object.

7.22.2 Constructor & Destructor Documentation

7.22.2.1 User()

```
latex_curriculum_vitae.User.User ( )
```

That constructor uses the config file to set up all user relevant information.

7.22.3 Member Function Documentation

7.22.3.1 UserFile()

```
void latex_curriculum_vitae.User.UserFile ( )  [private]
```

This method uses the information from the Properties to create the LaTEX user configuration file "personal_data.tex" what will be used by letter of application and also for curriculum_vitae.

The documentation for this class was generated from the following file:

- C:/Users/Sasch/OneDrive/source/repos/Visual_Studio/latex_curriculum_vitae-dotnet/latex_curriculum_↩ vitae/User.cs
